Professional Summary

Mid-level UI/UX Designer with 2+ years of experience crafting user-centered digital solutions for agriculture, e-commerce, and service industries. Combines strong UX research expertise with frontend development skills (HTML/CSS/JS) to deliver seamless, data-driven designs. Proven ability to lead cross-functional teams and solve complex user problems, evidenced by a 2nd-place national award in an FAO-sponsored competition. Seeking to leverage research-driven design and technical versatility to enhance product innovation at forward-thinking companies.

Projects

1. [Agricode \(FAO Competition - 2nd Place Winner\)](#)

UI/UX Designer & Team Lead

Project: Mobile app & web platform empowering Egyptian farmers with AI-driven agricultural solutions.

Role: Led end-to-end UX/UI design and frontend development.

Process:

- Conducted user interviews with 50+ farmers to identify pain points in information access.
- Developed personas, journey maps, and user flows for core features (AI Clinic, IoT Marketplace, Crop Tracker).
- Designed responsive interfaces in Figma, creating a scalable design system.
- Prototyped and tested solutions with 5 user groups, iterating based on feedback.

Tools: Figma, Illustrator, Photoshop, Canva

Impact:

- Reduced farmers' problem-solving time by 40% through AI-powered diagnostics.
- Simplified access to agricultural resources via an integrated digital library.
- Led a team of 4 developers and designers to deliver the project in 3 months.

2. Cleaning Services App (Saudi Arabia Client)

UI/UX Designer

Project: On-demand cleaning platform for homes & restaurants in KSA.

Role: Designed user flows, wireframes, and high-fidelity interfaces.

Process:

- Mapped service booking workflows and payment integration.

- Created Arabic/English UI components with cultural adaptation.

Tools: Adobe XD, Figma

Impact: Streamlined booking process, reducing user steps by 30%.

[3. E-Book Store App](#)

UI/UX Designer

Project: Mobile marketplace for digital and physical books.

Role: Developed product discovery flows and checkout optimization.

Process:

- Designed personalized recommendation algorithms UI.

- Conducted usability tests on payment flows.

Tools: Sketch, Figma

Impact: Increased user engagement by 25% through intuitive navigation.

Skills

UI Design, UX Research, Tools, Technical, Soft Skills

Visual Design, User Interviews, Figma (Expert), HTML/CSS, Team Leadership

Design Systems, Persona Development, Adobe XD, JavaScript Basics, Problem Solving

Prototyping, Journey Mapping, Illustrator, Responsive Design, Cross-Functional Collab

Wireframing, Usability Testing, Photoshop, Git/GitHub, Agile Methodology

Mobile-First Design, A/B Testing, Sketch, Framer (Basic), Client Communication

Education

Bachelor of Agricultural Sciences, Mansoura University, Egypt

Major: Plant Protection

Duration: 2021 – 2026

Relevant Coursework: Data Analysis, Environmental Science (Applied UX research skills to agricultural tech projects)

Languages

Arabic: Native

English: Professional Working Proficiency (Technical Reading/Writing, Conversational)

Interests

- Sustainable Agriculture: Researching tech solutions for small-scale farmers.

- Nature-Inspired Design: Applying organic patterns and eco-friendly aesthetics to digital interfaces.

- Open-Source UI: Contributing to design system libraries on GitHub.
